

AMENDMENTS TO THE SPECIFICATION

Please substitute the attached specification for the originally filed specification. A Mark-Up copy showing the corrections is attached hereto. No new matter has been entered into the specification.

The specification has been amended to identify:

70 as a press shoe or press beam;

K as a loading element;

22 as a flow path;

2 as an outer surface;

40 as a manifold; and

41 as a manifold.
